

PORTFOLIO

Made Mahatti Prayascita Chandra

MADE MAHATTI PRAYASCITA CHANDRA

I am a sixth-semester Informatics student at President University, concentrating in Artificial Intelligence. Throughout my academic journey, I balanced technical learning with active involvement in campus organizations. Over the past two years, I have taken several roles in various events and activities. Driven by a strong passion for UI/UX design and front-end development, I have dedicated time to mastering tools such as HTML, CSS, JavaScript, and React, along with graphic design and UI/UX design platforms like Figma and Framer. I enjoy transforming ideas into engaging user-friendly digital experiences and I've applied this in both academic projects and creative roles on campus. Now, I am eager to take the next step through an internship opportunity where I can apply my skills in real-world software development and tech-driven design environments.

SKILLSET

Skills: Graphic Design, Programming, UI Design, Video Editing, Copywriting, Teamwork, Communication, Leadership, Time Management, Public Relations.

Programming Language: HTML, CSS, JavaScript, Java, Python.

Software: VS Code, Figma, Canva, Android Studio, Framer, CapCut, DaVinci Resolve, Framer.

MY EDUCATION

2023 - present
President University

GPA: 3.92 / 4.00

Concentration: Artificial Intelligence

WORK EXPERIENCE

July 2023 - Present

Graphic Design & Video Editor

Designed engaging thumbnails and edited two videos daily, ensuring alignment with the brand's identity. Managed YouTube uploads, including writing titles and descriptions, which contributed to increased viewer engagement each quarter.

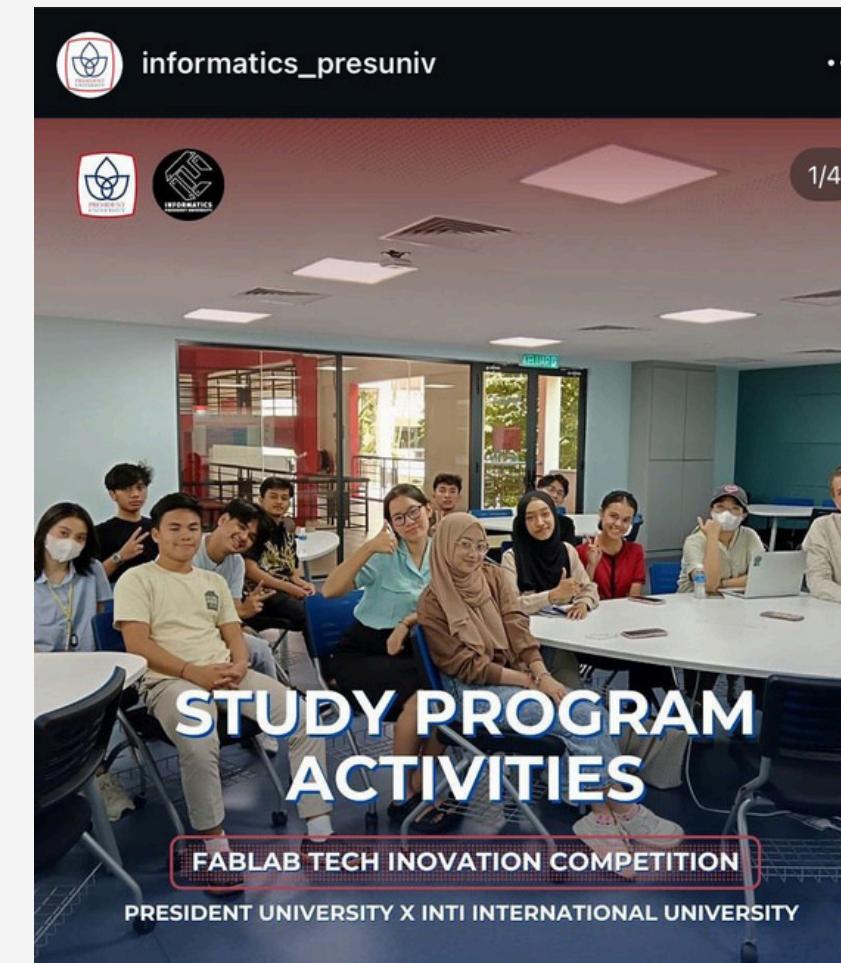

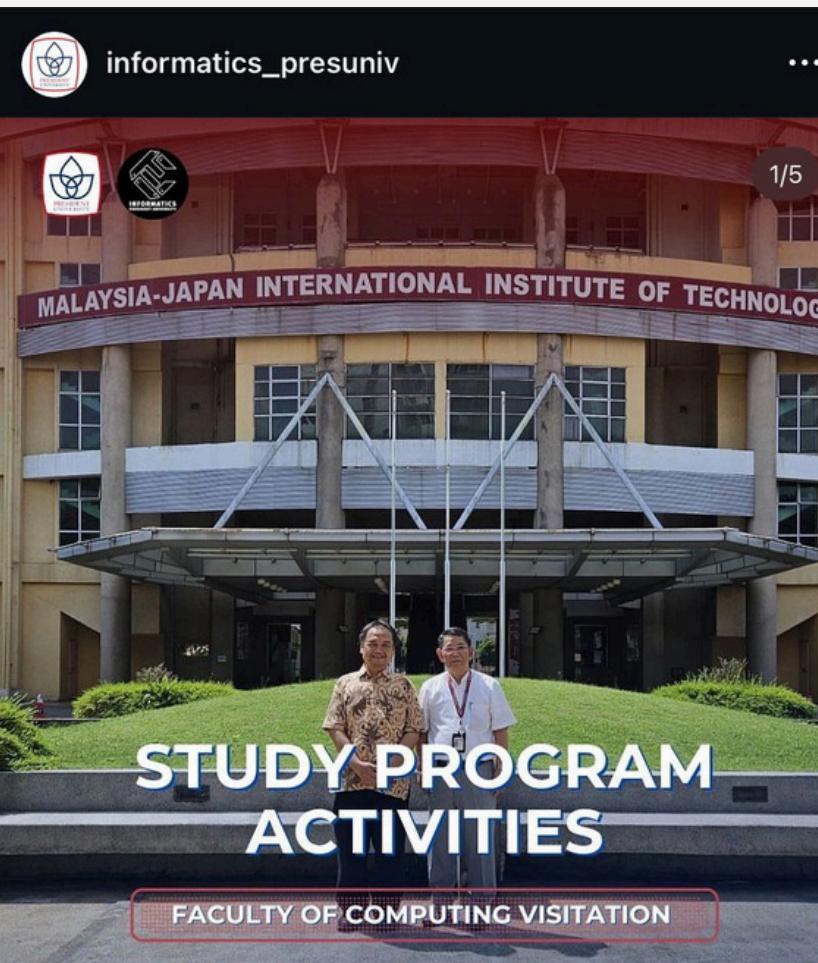

WORK EXPERIENCE

June - September 2024

Informatics President University

Designed daily Instagram feed content for the Informatics major's official account, designing 3 posts per week. Collaborated with team members and the Head of Study Program to align the content with academic and marketing goals.

ORGANIZATION EXPERIENCE

October 2024 - Present

Head of Information and Creative Media
PUMA Informatics

Conducted interviews to recruit 9 qualified team members and led a team of 11 in managing content for PUMA Informatics' social media and digital publications. Maintained a structured content timeline, ensuring the consistent release of 10-15 posts per month, while providing guidance and feedback to enhance design quality.

November 2023 - October 2024

Member of Communication & Design
PUMA Informatics

Designed the Instagram feed for the PUMA Informatics account and contributed to over 10 events organized by PUMA Informatics and PUFA Computer Science, primarily handling design and creative tasks. Served as the Person in Charge for the design division in 3 events, leading and coordinating design efforts to ensure high-quality visual outcomes.

EVENT

February 2025

Temu Alumni 2025 | Member of Public Relation Division

Find and contacted media partners, successfully securing 11 partnerships within 3 days. Coordinated communication and maintained strong relationships with media partners before and during the event. Acted as an usher for 20+ invited media partners on the event day, ensuring smooth collaboration and media coverage.

EVENT

November 2024

Computing Atmosphere 2024 | Member of Design Division

Contributed to the design division of the Faculty of Computer Science's largest annual event, which involved over 100 committee members and was held over three days. Designed visual assets including Instagram feed content and event placards.

EVENT

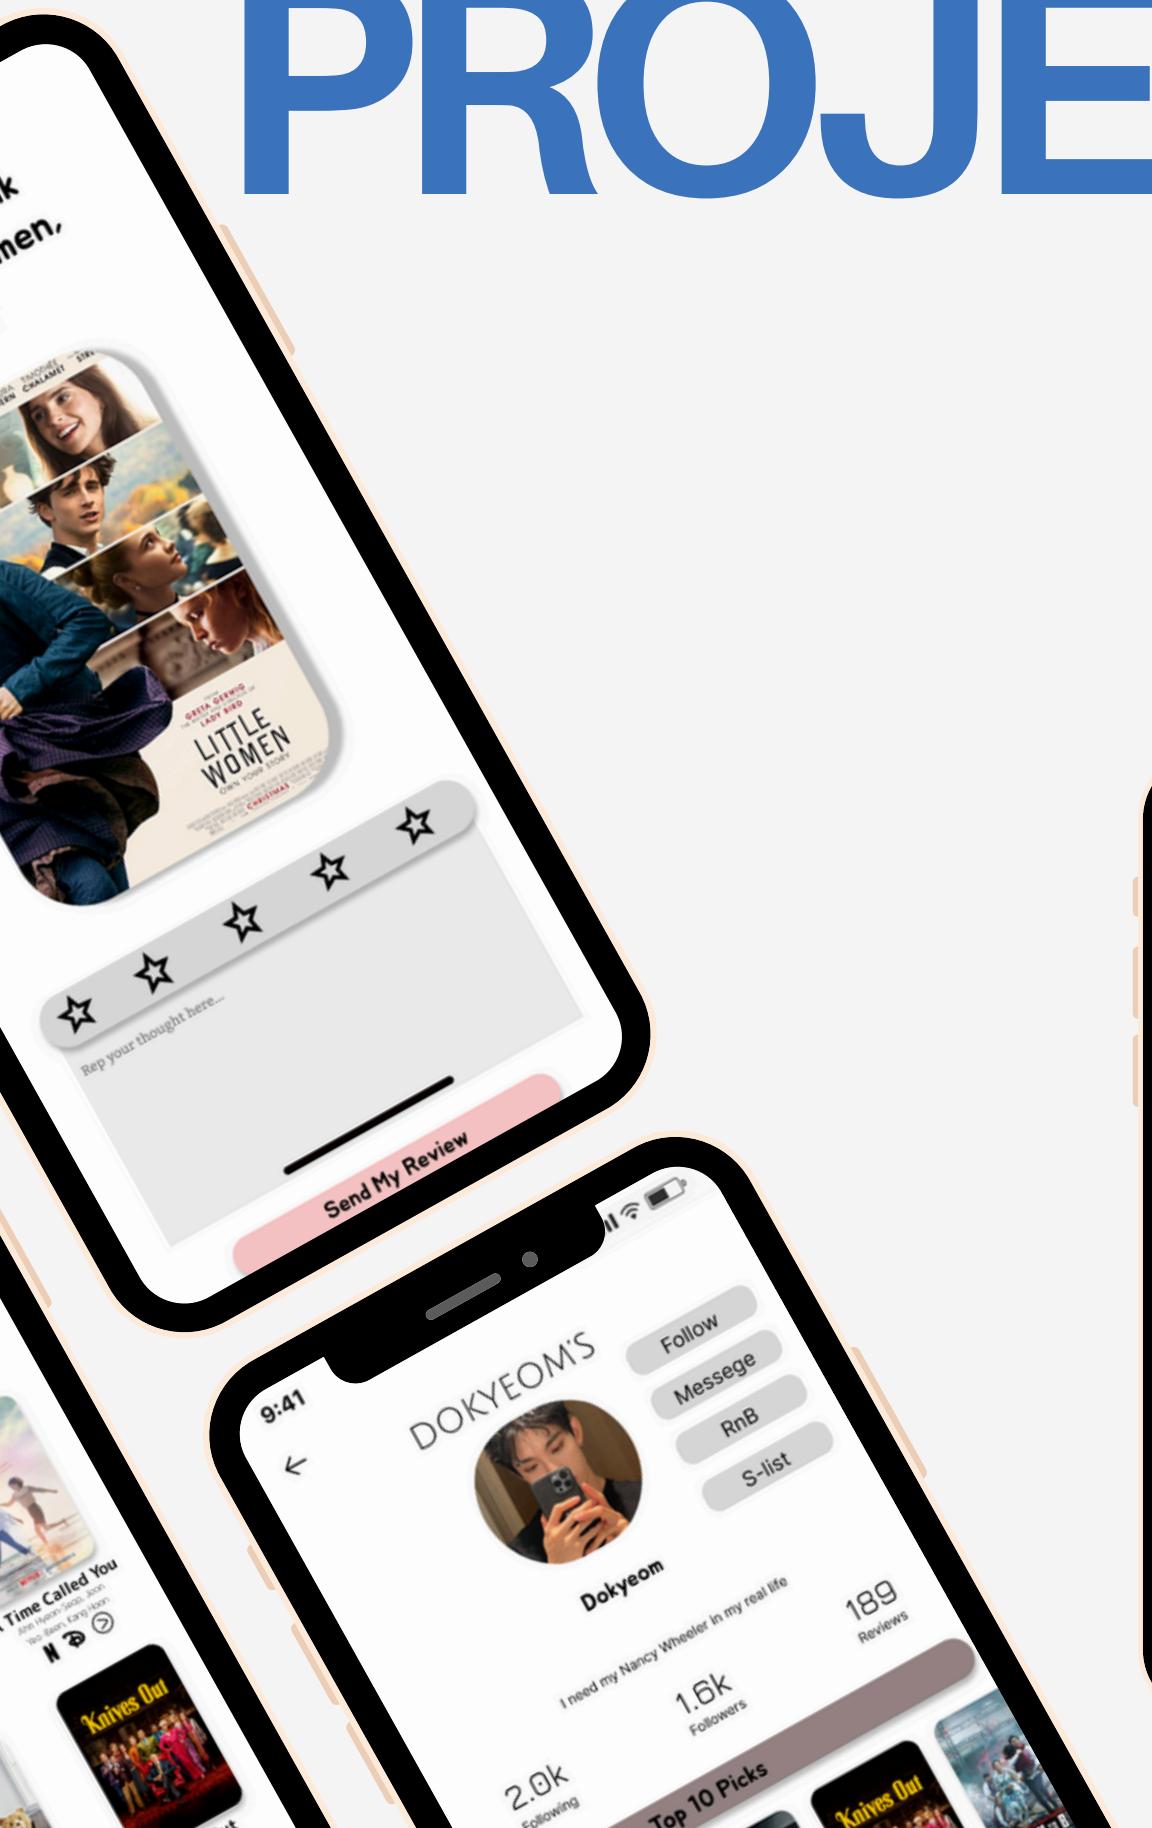

March 2024

Comparative Study 2024 | Person in Charge(PIC) of Design Division

Led the design division and oversaw all visual outputs for the event, developing the overall visual theme and color palette to ensure theme consistency. Delegated tasks and coordinated the team to meet event deadlines effectively.

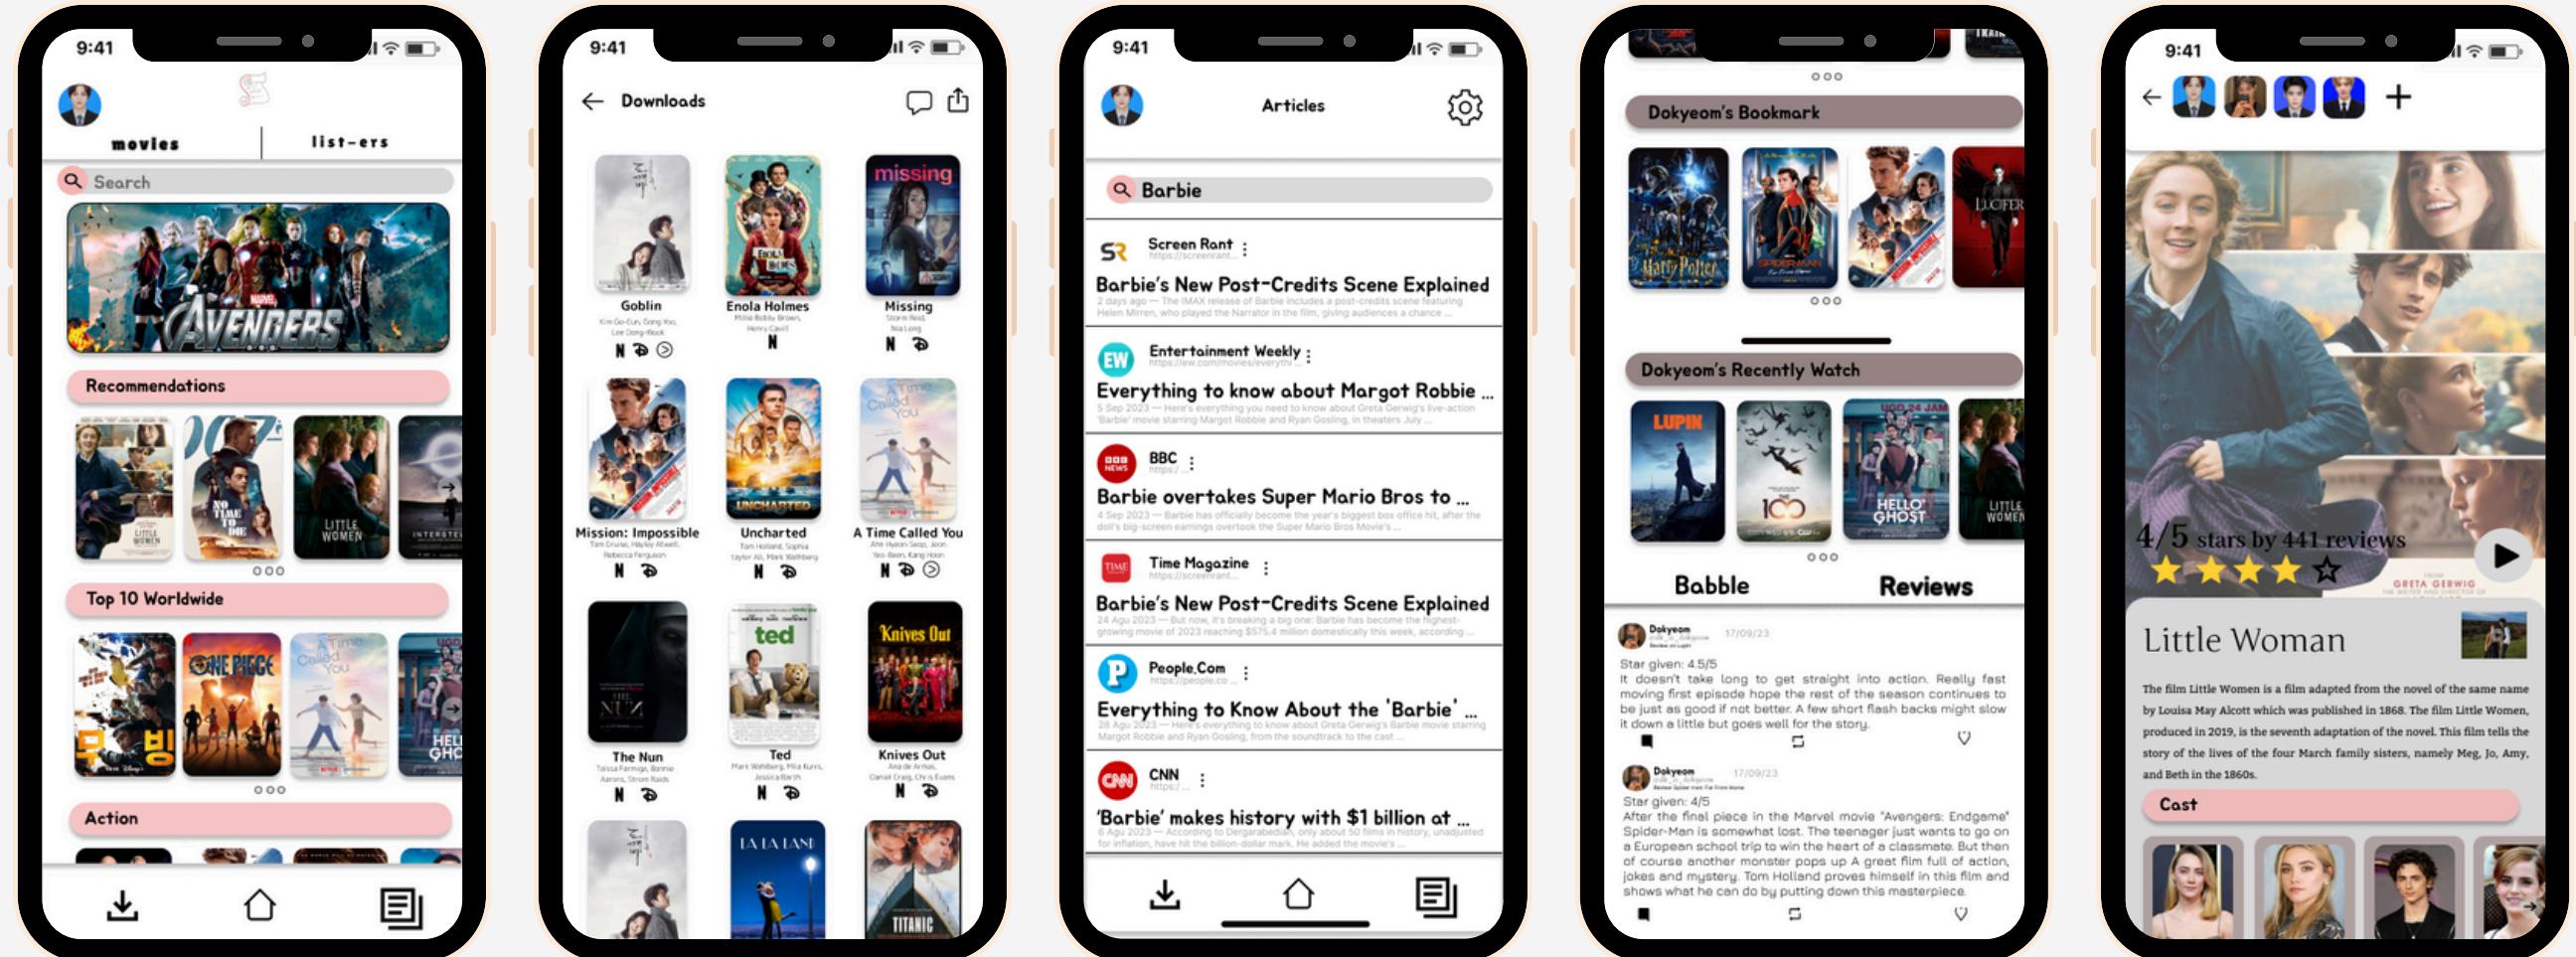

PROJECT

S-List

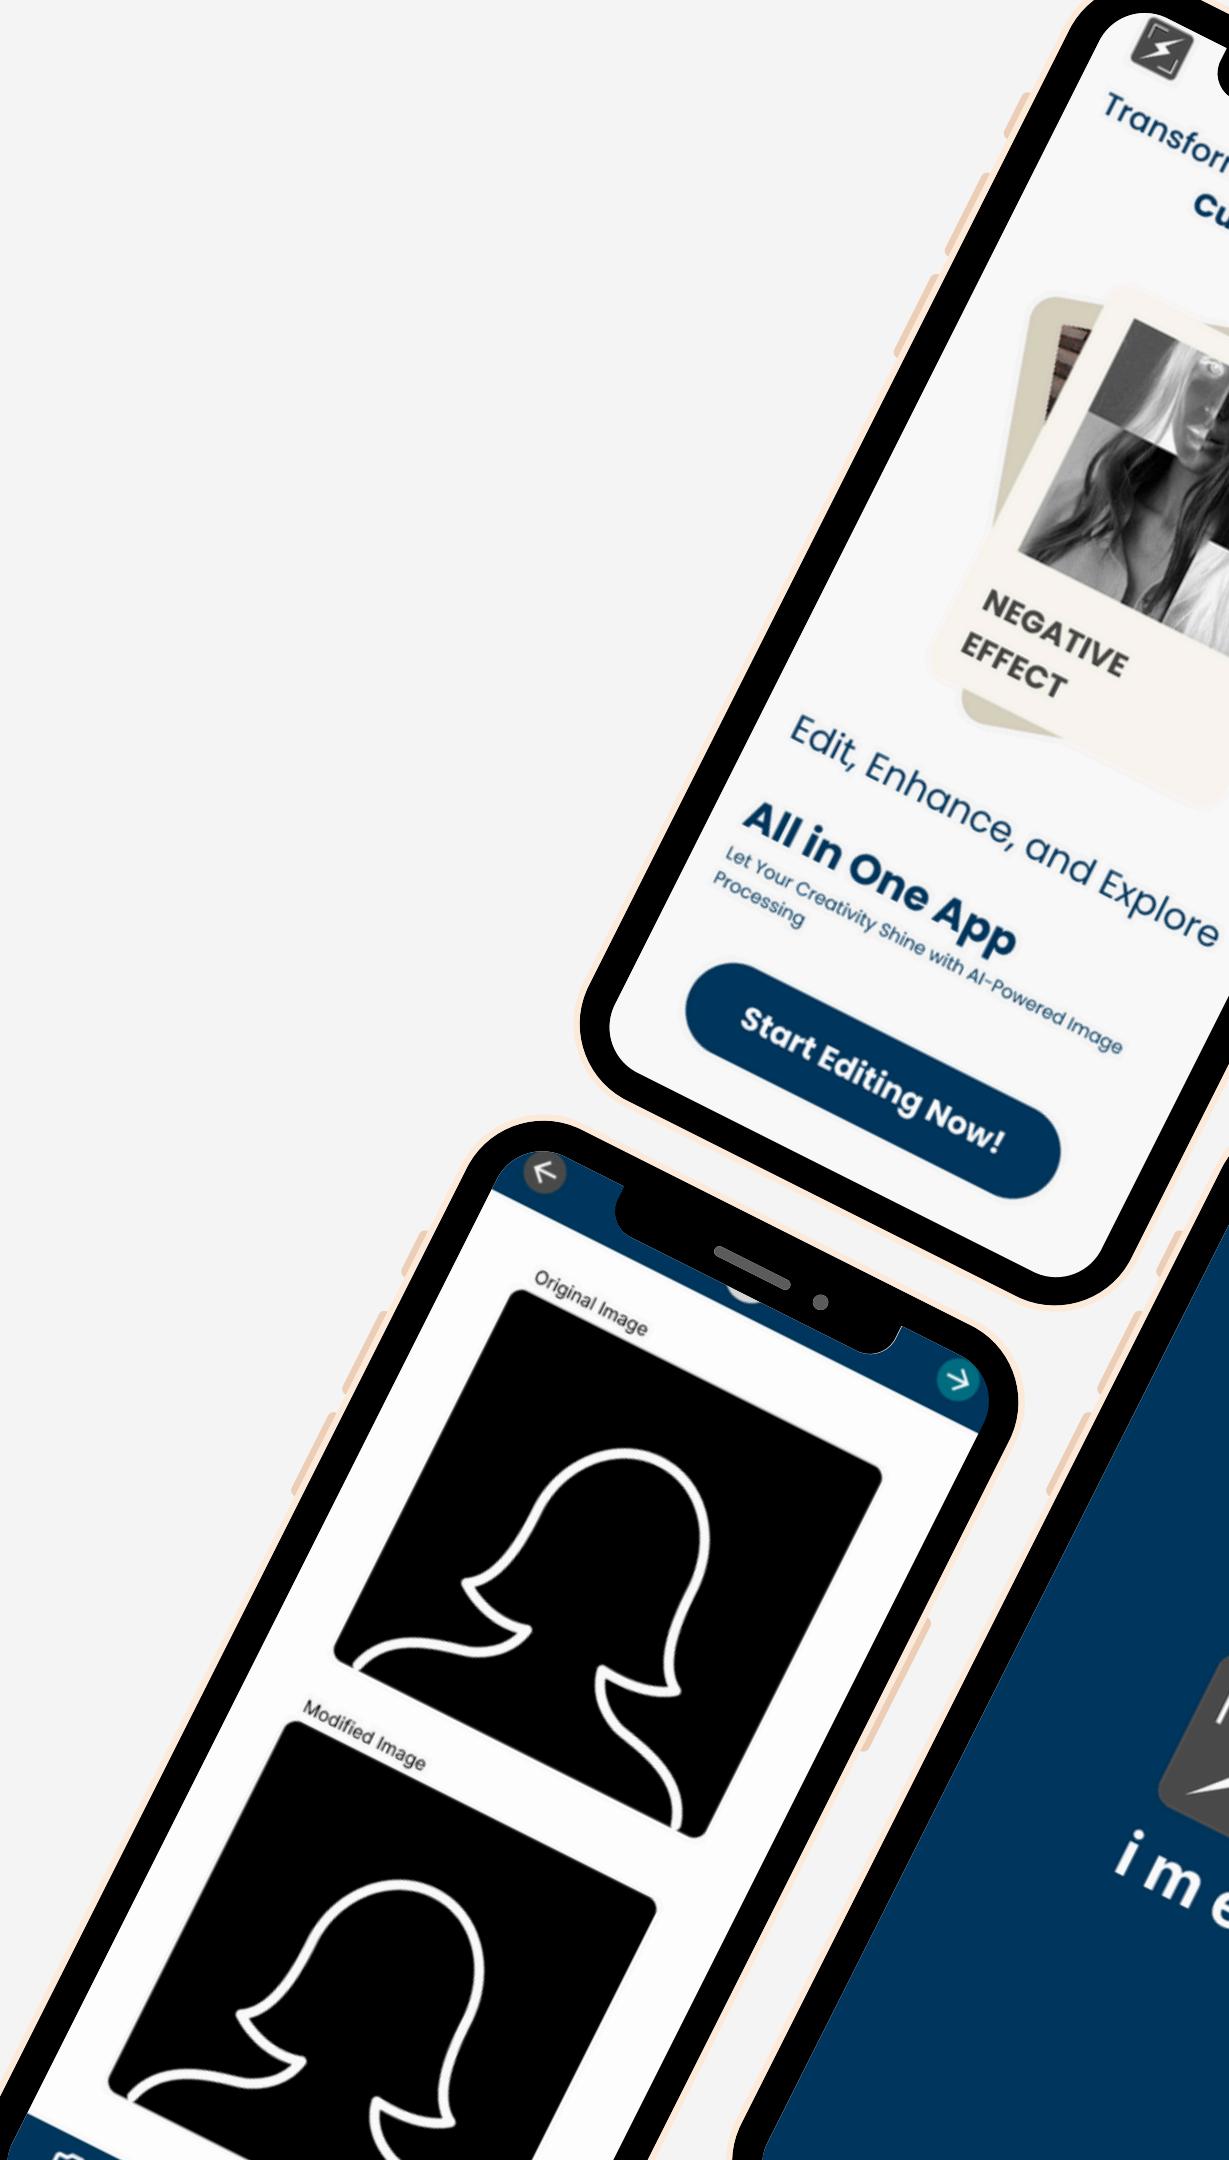

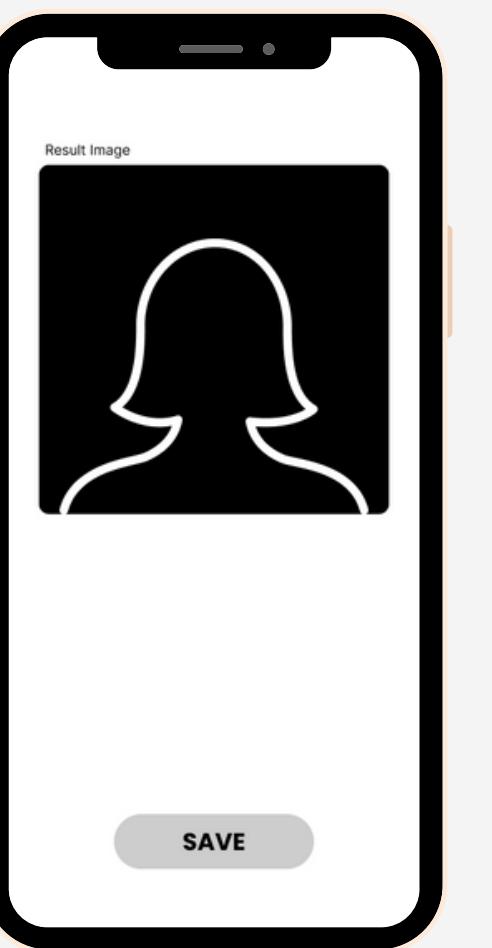

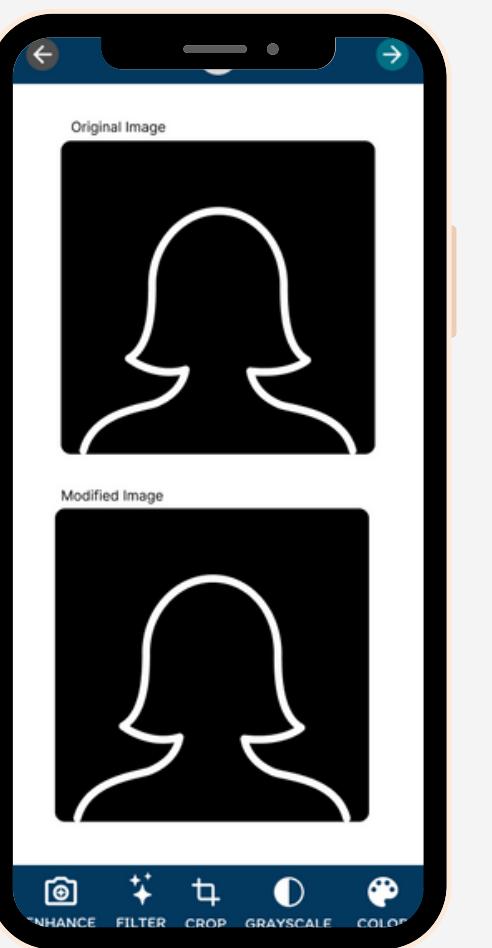

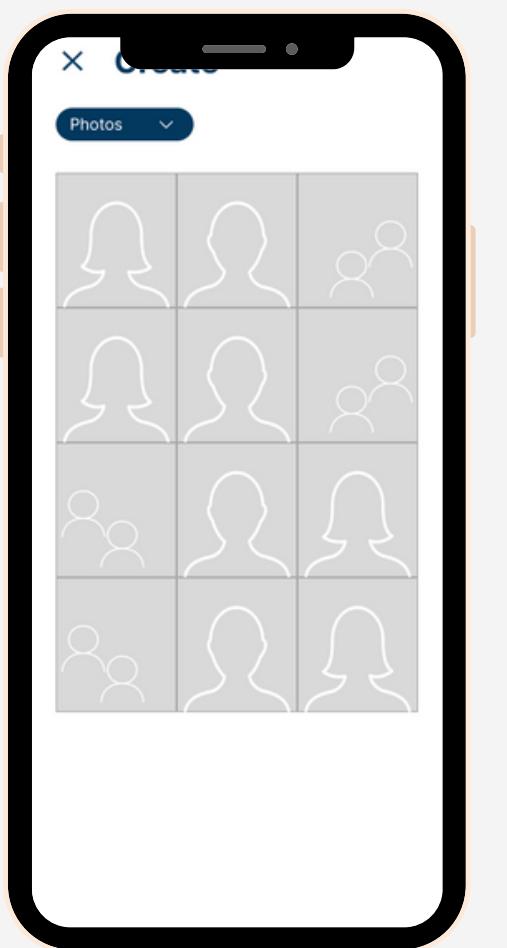

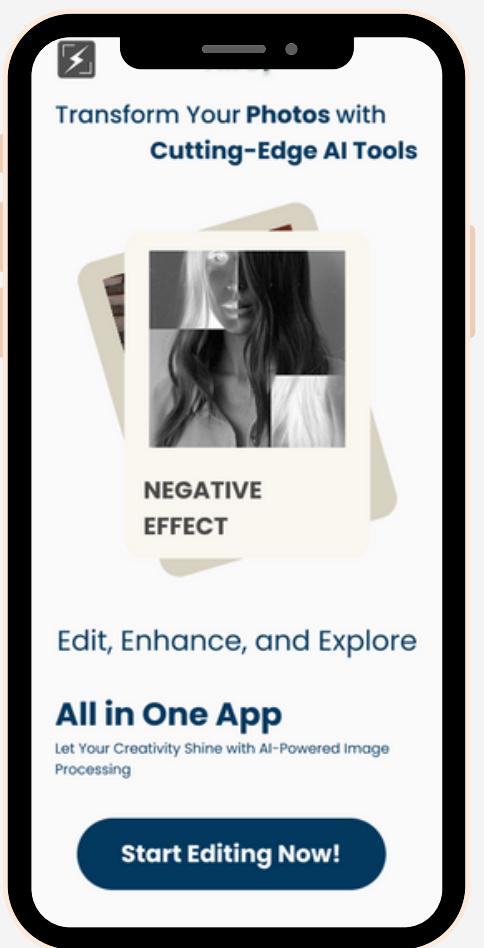

S-List is a social movie-listing application that blends the interactive experience of Twitter with the functionality of a movie tracking platform. Users can create personalized movie playlists—similar to music playlists—and easily share them with others. The app allows users to connect, follow, comment, and engage with fellow movie enthusiasts, fostering a vibrant social community. Additionally, users can leave reviews, rate films, and discover new movies through shared lists and social interactions.

PROJECT

iMEJ

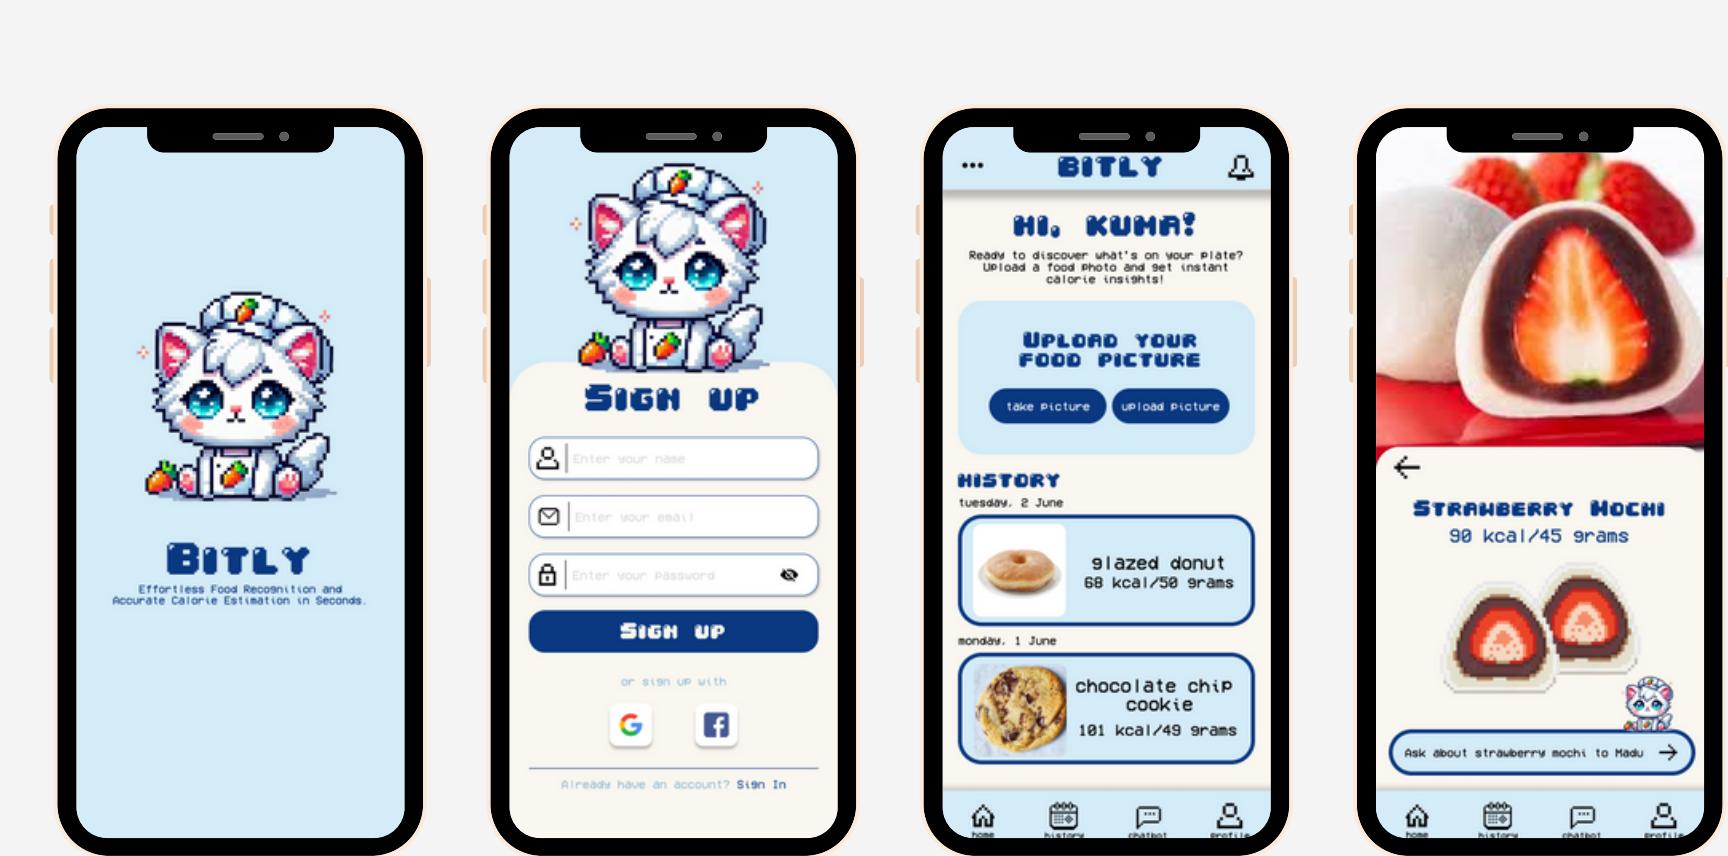

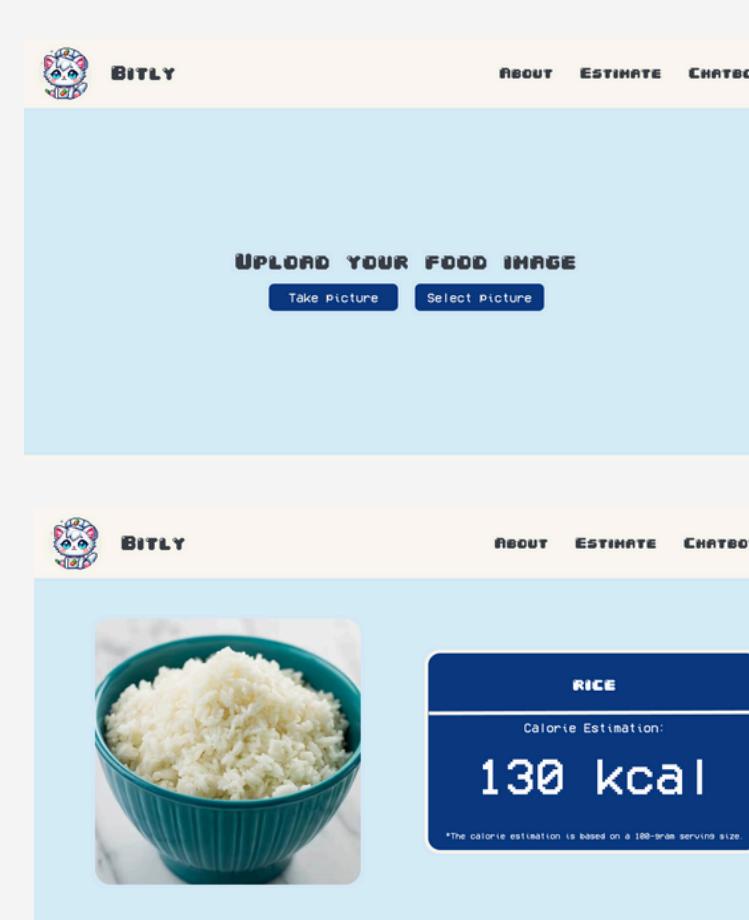

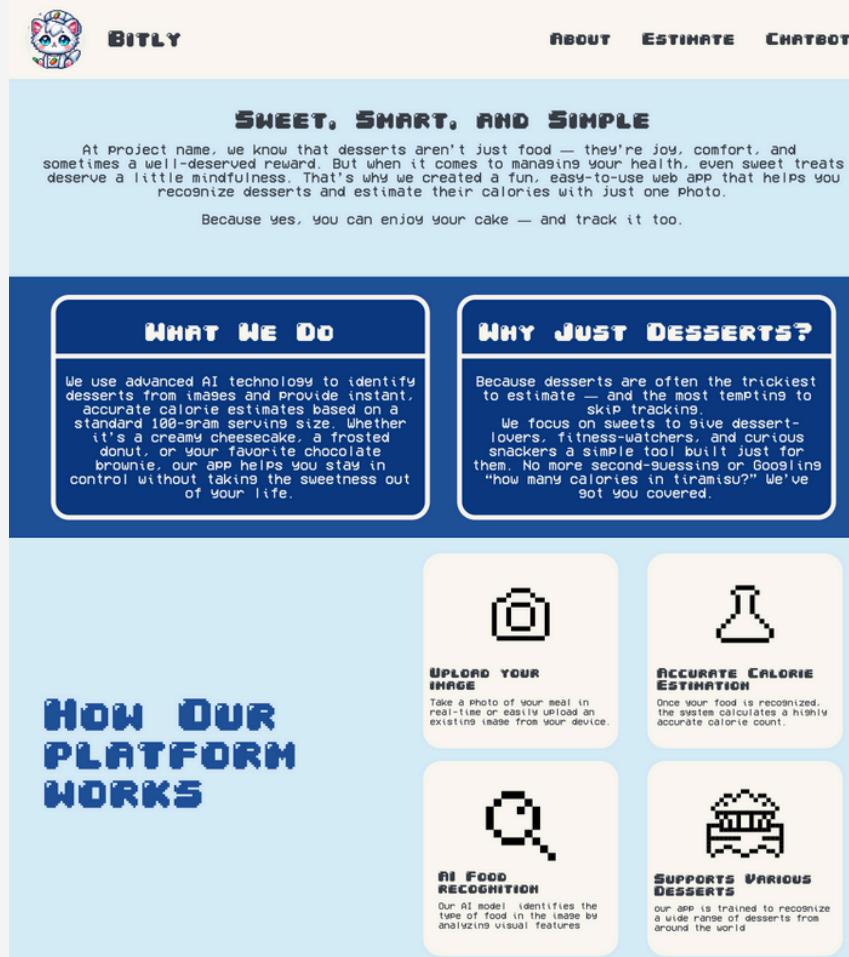

Imej is a photo editing mobile app that helps users enhance and customize their pictures easily. It offers basic tools like brightness, contrast, and filters, as well as some advanced features for more creative edits.

PROJECT

Bitly

Bitly is a smart food recognition application that leverages AI to identify food items from photos and accurately estimate the calories. In addition to instant food analysis, Bitly offers a convenient meal history feature, allowing users to track and review their past food recognitions. The app also includes an interactive chatbot that assists users with nutrition tips, answers food-related questions, and provides personalized suggestions for healthier eating.

PROJECT

Ticketopia

A comprehensive ticketing and event management system that allows users to browse, purchase, and manage event tickets seamlessly. The platform features user-friendly navigation for discovering events, secure transaction handling, and personalized ticket management.
